We do consider the present government crisis in Hungary basically as a moral one and not the political only. It has been caused by lies told by the governing Prime Minister, who did publicly admit having told lies on the economic situation of the country during several years. This government did since 2002 mislead and fuelled the nation and is responsible for the disastrous situation in the country.

We do firmly deny that lies – stated by the governmental allegation to the international press – are kind of political tradition in Hungarian politics. Truth and dignity have always been the ground of the political life in Hungary too. The government, in spite of being warned on consequences of such a policy during the past four years – e.g. by the European Union as well as the President of the National Bank of Hungary - does obviously not accept the consequences of such

Facing this insoluble moral crisis, the constitution of the Hungarian Republic seems not to offer any quick solution for the present situation.

We citizens of Western European countries are taking our responsibility for moral values as for a church organization of Jesus Christ and declare the present moral crisis having great political, economic and human consequences for Hungary and its population. As for creating common moral basis for everybody in the United Europe, we do make a public plea and request

- the Hungarian government seriously to consider new elections in the country
- all the governments of the European Union's countries; all the members of all bodies of the EU and the members of the European Parliament; not to handle the present problems along principles of party politics!

PLEASE HELP the Hungarians! Help this nation to find and reaffirm common human ethical and moral values!

An ignorant government and morally chaotic country in the Centre of our common Europe and continent is major hazard for all of us.
